Chemistry Division Findings

Comparison of Exhibits E-5, E-19a, D-23, E-63NB, E-116, D-118, E-119, E-203 revealed the presence of wood splinters identical in type, texture, and all other physical characteristics to the wood of Exhibit A.

In the opinion of the examiner that the wood splinters present in the exhibits listed in paragraph 1 could have originated from Exhibit A.

Comparison of paint chips removed from Exhibit A found same to be grossly similar in color, texture, and chemical composition to the paint of Exhibits E-203 and E-299.

In the opinion of the examiner that the paint of Exhibit A and the paint of Exhibit E-203 could have a common source of origin.

Comparison of Exhibits A-1 and A-2 found them to be grossly similar in color and size to the wood of Exhibit A. A study of the annual growth rings of Exhibit A showed that Exhibit A was not originally a part of Exhibits A-1 and A-2.

Comparison of Exhibits A-3 and A-4 found same to be different in type and physical characteristics to the wood of Exhibit A.

In the opinion of the examiner, that the paint of Exhibit A-4 and the paint of Exhibits A, E-203 and E-299 could have had a common source of origin.

Comparisons of the red-brown stains of Exhibits B-1, D-1, D-2, D-2R, D-5, D-7, D-18, D-18a, D-19, D-23, D-27, D-27R, D-28, D-30, D-51, D-136, D-159, D-209, D-215, D-227, D-229, D-231, D-232, D-254, D-258, D-263, D-264, D-266, D-271, D-272, D-273, D-274, D-275, D-276, D-70NB, D-207A, D-207C, E-301, E-302 and I-21 revealed the presence of human blood of the International Blood Group A.

Red-brown Stain of Exhibit D-1 and

Comparisons of the red liquid of Exhibit D-25 revealed the presence of human blood of the International Blood Group Type A.

D-33

Comparisons of the red-brown stains of Exhibits D-212, D-36NB, D-37NB, D-49NB, D-50NB, D-55NB, D-62NB, D-65NB and D-68NB revealed the presence of human blood of the International Blood Group Type O.

LABORATORY REPORT
RA-D-P-C-FP-82-70
(UNCLASSIFIED)

UNIT CASE NUMBER

Examinations of the red-brown stains of Exhibits D-10, D-36, D-40, D-43, D-114, D-156, D-25K, and D-26K revealed the presence of human blood of International Blood Group Type B.

Examinations of the red-brown stains of Exhibits D-61, D-123, D-126, D-127, D-128, D-134, D-145, D-157, D-163, D-208, D-207B and D-220 revealed the presence of human blood of the International Blood Group Type AB.

Examinations of the red-brown stains of Exhibit D-210, revealed the presence of human blood of the International Blood Group Types A, B, and AB.

Examinations of the red-brown stains of Exhibits A, D-56NB, D-66NB, D-165, D-214 revealed the presence of human blood of the International Blood Group Types A and AB on each Exhibit.

Examinations of the red-brown stains of Exhibit D-58NB revealed the presence of human blood of the International Blood Group Types O, A and AB.

Examinations of the red-brown stains of Exhibit D-64NB revealed the presence of human blood of the International Blood Group Types A and O.

Examinations of the red-brown stains of Exhibits I-3, D-4, D-13, D-20, D-74, D-130, D-132, D-137, D-140, D-151, D-152, D-158, D-256, D-272NB, B-2, D-267 and D-270 revealed the presence of human blood. Examinations indicated same to be of the International Blood Group Type O.

Examinations of the red-brown stains of Exhibits D-114 and D-153 revealed the presence of human blood. Further examinations indicated same to be of International Blood Group Type B or O.

Examinations of the red-brown stains of Exhibits D-33, D-108, D-238, D-277NB and E-63NB revealed the presence of human blood. Further examinations indicated same to be of the International Blood Group Type O.

Examinations of the red-brown stains of Exhibit D-116 revealed the presence of human blood. Further examinations indicated same to be of the International Blood Group Type AB.

Examinations of the red-brown stains of Exhibits D-8, D-31, D-49, D-216, D-265, D-278, I-226 and L revealed the presence of human blood. Examinations indicated same to be of the International Blood Group Type AB.

4A-14

71-CID011-0015

LABORATORY REPORT
FI-D-P-C-FP-82-70

UNIT CASE NUMBER
70-CID023-10198

Examination of the red-brown stains of Exhibit D-121 revealed the presence of human blood of the International Blood Group Type AB. Further examinations of other human blood stains indicated the International Blood Group Type O. Further examinations of other human blood stains indicated the presence of a mixture of the International Blood Group Types AB and A.

Examinations of the red-brown stains of Exhibits D-44, D-46, D-122 revealed the presence of human blood. Further examinations indicated the presence of the International Blood Group Type AB or B.

Examinations of the red-brown stains of Exhibit D-228 revealed the presence of human blood of the International Blood Group Type AB. Further examinations of other human blood stains indicated the International Blood Group Type A.

Other blood typing examinations of the Exhibits cited in paragraphs 44 were precluded due either to the paucity of the stain or the contamination of the stain.

Examinations of the red-brown stains of Exhibits D-14, D-34, D-35, D-56, D-64, D-72, D-73, D-95, D-104, D-106, D-107, D-109, D-118, D-148, D-150, D-154, D-155, D-161, D-19K, D-21K, D-23K, D-24K, D-33K(2), D-217, D-225, C, D-250, D-268 and D-269 revealed the presence of blood. Blood typing examinations were precluded due either to the paucity of the stain or the contamination of the stain.

Examinations of the red-brown stains of Exhibits D-12, D-55, D-62, D-63, D-67, D-69, D-71, D-221, D-222, D-223, D-224, D-230, D-233, D-234, D-236, D-237, D-239, D-5K, D-22K, D-27K, D-29K, D-33K(1), D-34K(1), D-10a, D-11, D-14a, D-29b, D-29c, D-30b, D-37, D-41, D-65, D-68, D-135, D-138, I-213, D-240, D-244, D-248 and D-262 indicated the presence of blood. Further examinations were precluded due to the paucity of the stain.

Examinations of Exhibits D-52, D-53, D-57, D-70, D-75 thru D-85, D-88, D-92, D-93, D-94, D-98, D-110, D-111, D-112, D-113, D-124, D-125, D-142, D-143, D-218, D-219, D-1K, D-2K, D-3K, D-4K, D-6K thru D-18K, D-19K, D-34K(2), D-40NB, D-42NB, D-241, D-242, D-243, D-245, D-246, D-249, D-252 and D-253 did not reveal the presence of any blood stains.

Macroscopic examinations of Exhibits D-48 and D-54 indicated the presence of blood. No further examinations were conducted.

Examinations of Exhibit D-19 and the panties and pajama bottom of D-212 revealed the presence of urine stains.

S-1

000073

71-CID011-0015

LABORATORY REPORT
FA-D-P-C-FP-82-70
(CONSOLIDATED)

UNIT CASE NUMBER
70-CID023-10198

Examinations of Exhibits D-19 and F-257 did not reveal the presence of
phen or semen stains.

Examinations of Exhibits F-1 and F-2 did not reveal the presence of any
drugs or narcotics. Further examinations of Exhibit F-2 by the
at Fort Gordon, GA showed same to contain 0.150 mg/ml of ethyl alcohol -
generally means that the subject was not under the influence of alcohol.

Examination of Exhibits D-23, D-123, D-221, D-229, D-237, E-3, E-6,
E-19a, E-20a, E-24, E-32, E-52NB, E-116, D-118, E-119, E-205, E-300,
E-302 and E-303 revealed the presence of fibers identical in type,
gender, twist, and all other physical characteristics to the fibers
pajama jacket, Exhibit D-210.

It is the opinion of the examiner that the fibers present in the Exhibits
paragraph 33 could have originated from Exhibit D-210.

Examination of Exhibits D-209, D-227, D-229, E-3, E-5, E-7, E-19a,
E-22, E-50, E-63NB, E-210 and E-302 revealed the presence of human
hairs, grossly similar in all physical characteristics to the head hair
Collette MacDonald.

It is the opinion of the examiner that one or more of the human head
present in the Exhibits of paragraph 35 could have originated from the
Collette MacDonald.

Examination of Exhibits D-221, D-227, D-229, E-10, E-11, E-13, E-50,
and E-120 revealed the presence of human head hairs, grossly similar
physical characteristics to the head hair of Kimberly MacDonald.

It is the opinion of the examiner that one or more of the human head
present in the Exhibits of paragraph 37 could have originated from the
Kimberly MacDonald.

Examination of Exhibits D-48NB, D-123, E-8, E-9, E-12, E-15, E-56NB,
and E-61NB revealed the presence of human hairs grossly similar in
physical characteristics to the head hair of Kristen MacDonald.

It is the opinion of the examiner that one or more of the human head
present in the Exhibits of paragraph 39 could have originated from the
of Kristen MacDonald.

LABORATORY REPORT

NUMBER FA-D-P-C-PP-82-70

(UNCLASSIFIED)

P43 rbs - D-127, type AB

UNIT CASE NUMBER

70-CID023-10198

P43 wax-like substance - D-123, G-131, G-201 - not same as house candle wax

Examinations of the red-brown stains of Exhibit D-67NB revealed the presence of human blood. In the opinion of the examiner it is a mixture of International Blood Group Types A and O.

Examinations of the red-brown stains of Exhibit D-60NB revealed the presence of human blood of the International Blood Group Type A. Further examinations of other human blood stains revealed the presence of a mixture of International Blood which, in the opinion of the examiner, is of the International Blood Group Types A and O.

Examinations of the red-brown stains of Exhibit D-41NB revealed the presence of human blood of the International Blood Group Type O. Further examinations of other human blood stains indicated the presence of the International Blood Group Type A or Type O.

Examinations - B-2, D-267-270 - A or O. P rbs D-216, D-255, D-261, D-265, D-273, D-274 and 43 were precluded due to the paucity of the stains. P A-100.

Examination of several hairs removed from Exhibit E-304 identified same as horse hair (horse). Human head hair was not present on this Exhibit.

Examination of Exhibits D-245, H-35NB, H-38NB, E-41NB, H-45NB, H-46NB, H-51NB and H-73MER did not reveal the presence of sufficient powder for chemical comparison.

Examination of the white tablet contained in Exhibit H-6 identified as Kolantyl Wafer. Kolantyl is used as a peptic ulcer medication and for stomachs.

Exhibits D-2a, D-4a, D-9a, D-29a, D-30a, D-38, D-39, D-42, D-47, D-30X, and D-32K were not subjected to blood typing studies since same were not intended for use as control samples.

Appropriate examinations of Exhibits E-1, E-2, E-11, E-15, E-22, E-117, E-129, E-206, E-211, E-51 MER, E-59 NB, F-60 and F-115 were performed. Examinations did not reveal any data of significance or relevance.

Examination of the known hair from Exhibits E-314 through E-319 found that same have different physical characteristics to the hair of Exhibits E-4

In the opinion of the examiner that the hair from Exhibits E-314 through E-319 and the unknown hair of Exhibits E-4 and E-5 did not have a common source of origin.

C-5

000075

EXHIBIT /S-1

FOR OFFICIAL USE ONLY

4A-17

71-CID011-0015

LABORATORY REPORT
FA-D-P-C-FP-82-70
(LABORATED)

UNIT CASE NUMBER
70-CID023-10198

Examination of Exhibit E-12 revealed the presence of a short human head that was grossly similar in all physical characteristics to the known hair of Exhibit E-305.

It is the opinion of the examiner that the hair of Exhibit E-12 and Exhibit E-305 could have originated from a common source.

Exhibits E-19a and E-116 contained human body or pubic hair that was similar in all physical characteristics to the known hair of Exhibit E-313.

It is the opinion of the examiner that the hair of Exhibits E-19a and E-116 could have had a common source of origin with the known hair of Exhibit E-313.

Examination of Exhibits E-50, E-52NB, E-57NB, E-123, E-221, E-222, E-229 did not reveal the presence of any hair grossly similar to the known hairs of Exhibits E-305 through E-313.

Comparative examinations of the hairs from Exhibits E-4 and E-5 revealed them to be dissimilar to the hairs from Exhibits E-305 through E-313.

Therefore it is the opinion of the examiners that the hairs of Exhibits E-4 and E-5 probably did not originate from the same point sources as the hairs of Exhibits E-305 through E-313.

However, it must be pointed out that the requested opinion regarding positively eliminating the subject as a possible source of the hair cannot be given without first examining numerous other point sources of body hair from the subject.

Comparison of wax removed from Exhibits D-123, G-131 and G-201 with the wax from Exhibits G(1-10) showed same to be different in chemical composition.

It is the opinion of the examiner that the wax present in Exhibits D-123, G-131 and G-201 did not originate from the candles G(1-10).

NOTE: The following findings were forwarded from this laboratory to the requesting agency as an addendum to the basic report.

The gloves of Exhibit D-245 are surgical gloves. These were received in a sealed package and the gloves were intact.

000076

LABORATORY REPORT
P-FA-D-P-C-FP-82-70
(UNCLASSIFIED)

UNIT CASE NUMBER
70-CID023-10198

Examinations were performed to see if the pieces of surgical gloves
the same type as the gloves of Exhibit D-245.

The following are approximate sizes of the pieces of surgeon's gloves:

- Exhibit I-3 - Size of a dime
- Exhibit I-21 - Three fourth's of one finger
- Exhibit I-213 - Size of a quarter
- Exhibit I-226 - Size of a dime

Exhibit L ("Esquire" with red stain on edge): The blood stain appeared
been made by a person's finger due to it's shape. However, it cannot
ively stated that it was made by a person's finger since definite
tern formation was precluded by the separations of the individual
(Reference our Laboratory Report No. P-FA-D-C-FP-R15, dated 2
1970.)

Exhibit E-1 contained particles of nut meats and hulls, small
slivers of a pink and silver Christmas tree ornament and dust.
No bloodstains were present.

Exhibit E-3 contained matted yellow paper fibers, particles of nut
meats, small round dots of colored paper material and dust. No
bloodstains were present.

Exhibit E-14 contained a small piece of dry vegetable matter, similar
to grass or hay. No bloodstains were present.

Exhibit E-117 contained two (2) animal hairs.

Exhibit E-124 contained one (1) animal hair and several fibers from
the purple green and pink quilt in the south bedroom. No blood stains
were present.

Exhibit E-129 contained several small pieces of dry vegetable matter
similar to grass or hay. No bloodstains were present.

Exhibit E-206 contained ^{one (1) animal hair and} several blue, green and yellow single strand
nylon fibers grossly similar to the fibers of the rug, Exhibit D-227.

Exhibit E-211 contained several pink nylon fibers and one (1) animal
hair.

4A-19

71-CID011-0 15

LABORATORY REPORT
SERIAL PA-D-P-C-FP-82-70
(UNDATED)

UNIT CASE NUMBER
70-CID023-10198

Exhibit E-51 MER contained multi-colored yarns similar to the type used in crocheting. No bloodstains were present.

Exhibit E-59NB contained several small pieces of dry vegetable matter, similar to grass or hay and one (1) animal hair.

Examination of Exhibits F-60 and F-115 showed same to be a small amount of hard yellow and white substance. No chemical tests were conducted on this substance.

term, "red crusts" of Exhibit D-256 referred to suspected dried. These were not analyzed for anything other than blood type as stated in paragraph 9 of the Preliminary Report.

gloves of Exhibits D-3JK and D-3LK are not surgical gloves, therefore identifiable with the suspected pieces of surgical gloves of Exhibits I-3, I-13 and I-226.

FBI - FA-D-P-C-FP-82-70
(CONSOLIDATED)

Fingerprint Division Findings

Examination of Exhibits A thru C, I, K, M, N, and X did not reveal any latent prints.

Examination of Exhibits L-1 thru L-10 revealed numerous latent prints on L-1 thru L-4, L-10 thru L-11, an advertisement page and back magazine cover.

Examination of Exhibit J revealed one latent fingerprint and one latent palm print suitable for identification.

Examination of Exhibits R-1 and R-2 revealed three latent fingerprints on R-1 and one latent print on Exhibit R-2 that are suitable for identification.

Examination of Exhibits S-1 and S-2 revealed one latent fingerprint on S-1 and one latent palm print that are suitable for identification.

Examination of Exhibit T revealed one latent fingerprint suitable for identification.

Examination of Exhibits U-1 thru U-7, photographs of latent finger and palm prints, revealed:

Exhibit U-1 - One latent print.

Exhibit U-2 - Three latent fingerprints and three latent palm prints.

Exhibit U-3 - Thirteen latent fingerprints and eleven latent palm prints.

Exhibit U-4 - Three latent fingerprints and three latent palm prints.

Exhibit U-5 - Twelve latent fingerprints and seven latent palm prints.

Exhibit U-6 - Four latent fingerprints and four latent palm prints.

Exhibit U-7 - One latent fingerprint.

Examination of Exhibit W-5, headboard and footboard, revealed one partial palm print on the footboard.

Examination of the foot impression on the floor of the north bedroom

revealed that it was not made by the person whose record footprint is designated Exhibit V-2 (Collette MacDonald).

That it was not made by the person whose record footprint is designated Exhibit V-3 (Ronald Harrison).

S-1

000079
29

REPORT
DA-D-P-C-FP-82-70
(DATED)

4A-21

UNIT CASE NUMBER
70-CID023-10198

Comparison of the latent prints developed on Exhibits previously identified, with record prints submitted revealed:

Exhibits P thru T - No matching impressions.

Exhibit U-1 - The latent footprint was made by Mrs. C. MacDONALD's left foot.

Exhibit U-2 - One latent fingerprint was made by Mrs. C. MacDONALD. One latent palm print was made by Cpt. J. MacDONALD.

Exhibit U-3 - Eight latent fingerprints were made by Mrs. C. MacDONALD. Two latent palm prints were made by Mrs. C. MacDONALD and one latent palm print was made by Cpt. J. MacDONALD.

Exhibit U-4 - Two latent fingerprints were made by Mrs. C. MacDONALD. One latent palm print was made by Cpt. J. MacDONALD.

Exhibit U-5 - Seven latent fingerprints were made by Cpt. J. MacDONALD. and two latent fingerprints were made by Mrs. C. MacDONALD.

Exhibit U-6 - One latent fingerprint was made by an investigator.

Remaining latent prints were not identified. However, due to lack of clarity in some areas of the record finger and palm prints of Cpt. and MacDONALD, a complete elimination/identification could not be made.

Foot impression, appearing on Exhibit D-215, matches in general shape, and size the record footprint of Cpt. J. MacDONALD. However, due to individual ridge characteristics in the photographs taken of this positive identification could not be made by the examiner.

Exhibits V-10 through V-71 submitted by Det B, 3rd MP GP (CI), Fort Bragg, record fingerprints and/or palm prints of possible subjects and other involved in this case. A listing of these personnel is found in Case 70-CID023-10198 of requesting agency.

Comparison of Exhibits V-10 through V-71 (record fingerprints and/or palm prints) with the unidentified latent finger and/or palm prints developed in this case did not reveal any matching impressions.

Comparison of the identifiable latent prints developed on Exhibit L, (Esquire magazine) with the record prints Exhibits V-1 and V-2 revealed the following:

Exhibit L-1 (advertisement page) - was made by the left ring finger of Captain MacDONALD.

Exhibit L-4 (page 99) - was not identified.

Exhibit L-9 (page 101) - was made by the left index finger of Captain MacDONALD.

- was made by the left thumb of Captain MacDONALD.

Exhibit L-13 (page 104)

- was made by the left middle finger of Captain MacDONALD.

Exhibit L-15 (page 109)

- was made by the right thumb of Captain MacDonald.

Exhibit L-19 (page 114)

- was made by the right thumb of Mrs. MacDONALD.

Exhibit L-20 (page 114)

- is a partial latent palm print co-ordinated w/right thumb of Mrs. MacDONALD identified as Exhibit L-19.

Exhibit L-23 (page 116)

- was made by the right thumb of Mrs. MacDONALD.

Exhibit L-24 (page 116)

- was not identified.

Exhibit L-25 (page 116)

- was not identified.

Exhibit L-26 (back cover page)

- was not identified.

NOTE: Regarding the red stain on the edge of the Esquire magazine, attention is directed to paragraph 22 of the chemistry annex of this report in which it is reported that the red stain is in fact blood and is of the Blood Group Type A or AB.

During the scene process, this magazine was found in one of the two stacks of books, magazines and a cardboard box which was under the edge of the table located in the living room in front of the sofa.

The impression appeared to have been made by a person's finger due to its shape. However, it cannot be positively stated that it was made by a person's finger because the definite ridge pattern formation was precluded by the separations between individual pages.

Index of Exhibits

A complete index of the exhibits examined in this case is found on pages 1 thru 13 of this consolidated report. Note that an alpha-numeric system was adopted by USACIL technicians to identify the evidence forwarded to the laboratory for processing. The system was devised to assist laboratory personnel in easily identifying the type evidence to be examined (i. e. the letter "D" is the prefix utilized for blood-stains, the letter "V" is the prefix used for fingerprints, etc.), while letter suffixes indicate the location of where the exhibits were found at the crime scene. (i. e. NB=north bedroom, MBR=master bedroom, K=kitchen, etc.) All evidence in this case was handled in accordance with current Army regulations and accountability records are on file both at the office of the requesting unit and in the administrative and technical divisions of USACIL.

Chemistry Division Findings

Examination of Exhibits E-5, E-19a, D-23, E-63NB, E-116, D-118, and E-119 revealed the presence of wood splinters identical in type, color, texture, and other physical characteristics to the wood of Exhibit A.

It is the opinion of the examiner that the wood splinters present in Exhibits listed in paragraph 1 could have originated from Exhibit A.

Examination of paint chips removed from Exhibit A found same to be grossly similar in color, texture, and chemical composition to the paint of Exhibit

It is the opinion of the examiner that the paint of Exhibit A and the paint of Exhibit E-203 could have a common source of origin.

Examination of Exhibits A-1 and A-2 found them to be grossly similar in color, and size to the wood of Exhibit A. A study of the annual growth pattern of Exhibit A showed that Exhibit A was not originally a part of Exhibits A-1 and A-2.

Examination of Exhibits A-3 and A-4 found same to be different in type and physical characteristics to the wood of Exhibit A.

Examination of paint chips removed from Exhibit A-4 found same to be grossly similar in color, texture and chemical composition to the paint of Exhibits A and E-203.

It is the opinion of the examiner, that the paint of Exhibit A-4 and the paint of Exhibits A and E-203 could have had a common source of origin.

Examinations of the red-brown stains of Exhibits B-1, D-2, D-2R, D-5, D-7, D-17, D-18, D-18a, D-19, D-23, D-27, D-27R, D-28, D-30, D-51, D-136, D-141, D-149, D-209, D-215, D-227, D-229, D-231, D-232, D-254, D-258, D-259, D-260, D-263, D-266, D-271, D-272, D-273, D-274, D-275, D-276, D-277, D-69NB, D-70NB, D-207C, E-301, E-302, and I-21 revealed the presence of human blood of the International Blood Group A.

Examinations of the red-brown stain of Exhibit D-1 and the red liquid of Exhibit D-25 revealed the presence of human blood of the International Blood Group A.

Examinations of the red-brown stains of Exhibits D-33, D-212, D-36NB, D-43NB, D-48NB, D-49NB, D-50NB, D-55NB, D-62NB, D-65NB, and D-68NB revealed the presence of human blood of the International Blood Group Type O.

LABORATORY REPORT
FBI-FA-D-P-C-FP-82-70
(CONSOLIDATED)

UNIT CASE NUMBER
70-CID023-10198

Examinations of the red-brown stains of Exhibits D-10, D-36, D-40, D-43, D-114, D-156, D-25K, and D-26K revealed the presence of human blood of International Blood Group Type B.

Examinations of the red-brown stains of Exhibits D-61, D-123, D-126, D-128, D-134, D-145, D-157, D-163, D-208, D-207B, and D-220 revealed presence of human blood of the International Blood Group Type AB.

Examinations of the red-brown stains of Exhibit D-210 revealed the presence of human blood of the International Blood Group Types A, B, and AB. *

Examinations of the red-brown stains of Exhibits A, D-56NB, D-66NB, D-165, and D-214 revealed the presence of human blood of the International Blood Types A and AB on each Exhibit.

Examinations of the red-brown stains of Exhibit D-58NB revealed the presence of human blood of the International Blood Group Types O, A, and AB.

Examinations of the red-brown stains of Exhibit D-64NB revealed the presence of human blood of the International Blood Group Types A and O.

Examinations of the red-brown stains of Exhibits I-3, D-4, D-13, D-20, D-26, D-74, D-130, D-132, D-137, D-140, D-151, D-152, D-156, D-256, D-71NB and D-72NB revealed the presence of human blood. Further examinations indicated same to be of the International Blood Group Type A or Type O.

Examinations of the red-brown stains of Exhibits D-144 and D-153 revealed presence of human blood. Further examinations indicated same to be of International Blood Group Type B or O.

Examinations of the red-brown stains of Exhibits D-108, D-238, D-53NB, and D-63NB revealed the presence of human blood. Further examinations indicated same to be of the International Blood Group Type O.

Examinations of the red-brown stains of Exhibit D-146 revealed the presence of human blood. Further examinations indicated same to be of the International Blood Group Type AB.

Examinations of the red-brown stains of Exhibits D-8, D-31, D-49, I-226, and I-227 revealed the presence of human blood. Further examinations indicated same to be of the International Blood Group Type A or AB.

Examination of the red-brown stains of Exhibit D-121 revealed the presence of human blood of the International Blood Group Type AB. Further examinations of other human blood stains indicated the International Blood Group Type O.

Examinations of other human blood stains indicated the presence of a human blood of the International Blood Group Types AB and A.

LABORATORY REPORT

FA-D-P-C-FP-82-70

(UNCLASSIFIED)

UNIT CASE NUMBER

70-CID023-10198

Examinations of the red-brown stains of Exhibits D-44, D-46, and D-122 revealed the presence of human blood. Further examinations indicated same of the International Blood Group Type AB or B.

Examinations of the red-brown stains of Exhibit D-228 revealed the presence of human blood of the International Blood Group Type AB. Further examinations of other human blood stains indicated the International Blood Group

Further blood typing examinations of the Exhibits cited in paragraphs 18 were precluded due either to the paucity of the stain or the contamination of the stain.

Examinations of the red-brown stains of Exhibits D-14, D-34, D-35, D-56, D-59, D-64, D-72, D-73, D-95, D-104, D-106, D-107, D-109, D-118, D-148, D-150, D-154, D-155, D-161, D-19K, D-21K, D-23K, D-24K, D-33K(2), and D-34K(2) revealed the presence of human blood. Blood typing examinations were precluded due either to the paucity of the stain or the contamination of the stain.

Examinations of the red-brown stains of Exhibits D-12, D-55, D-62, D-63, D-57, D-69, D-71, D-221, D-222, D-223, D-224, D-230, D-233, D-234, D-235, D-237, D-239, D-5K, D-22K, D-27K, D-29K, D-33K(1), and D-34K(1) indicated the presence of blood. Further examinations were precluded due to the paucity of the stain.

Examinations of Exhibits D-52, D-53, D-57, D-70, D-75 thru D-65, D-88, D-90, D-92, D-93, D-94, D-98, D-110, D-111, D-112, D-113, D-124, D-125, D-142, D-143, D-218, D-219, D-1K, D-2K, D-3K, D-4K, D-6K thru D-16K, D-28K, D-30K, D-34K(2), D-40NB, and D-42NB did not reveal the presence of blood stains.

Mass macroscopic examinations of Exhibits D-48 and D-54 indicated the presence of blood. No further examinations were conducted.

Examinations of Exhibit D-19 and the panties and pajama bottom of Exhibit D-212 revealed the presence of urine stains.

Examinations of Exhibits D-19 and F-257 did not reveal the presence of semen or sperm stains.

Examinations of Exhibits F-1 and F-2 did not reveal the presence of any controlled substances or narcotics. Further examinations of Exhibit F-2 by the Forensic Laboratory, Fort Gordon, Ga. showed same to contain 0.150 mg/ml of ethyl alcohol - which generally means that the subject was not under the influence of alcohol.

Examination of Exhibits D-23, D-123, D-221, D-229, D-237, E-3, E-6, E-19a, E-20a, E-24, E-32, E-52NB, E-116, D-118, E-119, and E-205 revealed the presence of fibers identical in type, color, denier, twist, and other physical characteristics to the fibers of the pajama jacket, Exhibit D-210.

LABORATORY REPORT
Q. FA-D-P-C-FP-82-70
(CONSOLIDATED)

UNIT CASE NUMBER
70-CID023-10198

is the opinion of the examiner that the fibers present in the Exhibits of paragraph 34 could have originated from Exhibit D-210.

Examination of Exhibits D-209, D-227, D-229, E-3, E-5, E-7, E-19a, E-20a, E-63NB and E-210 revealed the presence of human head hairs, grossly similar in all physical characteristics to the head hair of Collette MacDonald.

is the opinion of the examiner that one or more of the human head hairs present in the Exhibits of paragraph 36 could have originated from the head of Kimberly MacDonald.

Examination of Exhibits D-221, D-227, D-229, E-10, E-11, E-13, E-50, E-116, and E-117 revealed the presence of human head hairs, grossly similar in all physical characteristics to the head hair of Kimberly MacDonald.

is the opinion of the examiner that one or more of the human head hairs present in the Exhibits of paragraph 38 could have originated from the head of Kimberly MacDonald.

Examination of Exhibits D-48NB, D-123, E-8, E-9, E-12, E-56NB, E-57NB, and E-58NB revealed the presence of human hairs grossly similar in all physical characteristics to the head hair of Kristen MacDonald.

is the opinion of the examiner that one or more of the human head hairs present in the Exhibits of paragraph 40 could have originated from the head of Kimberly MacDonald.

Examination of the wax like substance of Exhibits D-123, G-131, and G-132 and same to be different in chemical composition to the wax from the MacDonald Home.

Examinations of the red-brown stains of Exhibit D-127 revealed the presence of blood of the International Blood Group Type AB.

Examinations of the red-brown stains of Exhibit D-67NB revealed the presence of blood. In the opinion of the examiner it is a mixture of the International Blood Group Types A and O.

Examinations of the red-brown stains of Exhibit D-60NB revealed the presence of blood of the International Blood Group Type A. Further examinations of human blood stains revealed the presence of a mixture of human blood. In the opinion of the examiner, is of the International Blood Group Types A and O.

Examinations of the red-brown stains of Exhibit D-41NB revealed the presence of blood of the International Blood Group Type O. Further examinations of human blood stains indicated the presence of the International Blood Group Type O.

REPORT
P-C-FP-02-70

UNIT CASE NUMBER
70-CID023-10198

Examinations of the red-brown stains of Exhibits B-2, D-267, and D-270 revealed the presence of human blood. Further examinations of same indicated the presence of the International Blood Group Type A or Type O.

Examinations of the red-brown stains of Exhibits D-216, D-255, D-261, and D-262 revealed the presence of human blood. Further examinations of same indicated the presence of the International Blood Group Type A or Type O.

Examinations of the red-brown stains of Exhibit D-251 revealed the presence of human blood. Further examinations of same indicated the presence of the International Blood Group Type B or Type AB.

Further blood typing examinations of the Exhibits cited in paragraphs 1 through 5 were precluded due to the paucity of the stains.

Examinations of the red-brown stains of Exhibits C, D-217, D-250, D-268, and D-269 revealed the presence of human blood. Blood typing examinations were precluded due to the paucity of the stain.

Examinations of the red-brown stains of Exhibits D-240, D-244, D-248, and D-249 revealed the presence of blood. Confirmatory examinations were precluded due to the paucity of the stain.

Examinations of Exhibits D-241, D-242, D-243, D-245, D-246, D-247, D-249, and D-253 did not reveal the presence of any blood stains.

Examination of Exhibits E-300, E-301, E-302, and E-303 revealed the presence of fibers identical in type, color, denier, twist, and all other physical characteristics to the fibers of the pajama jacket, Exhibit D-210.

In the opinion of the examiner that the fibers present in Exhibits E-300, E-301, E-302, and E-303 could have originated from Exhibit D-210.

Examination of Exhibit E-302 revealed the presence of one human head hair identical in all physical characteristics to the head hair of Collette MacDonald.

In the opinion of the examiner that the hair present in Exhibit E-302 could have originated from the head of Collette MacDonald.

Examination of Exhibits E-301 and E-303 revealed the presence of wood splinters identical in type, color, texture, and all other physical characteristics to the wood of Exhibit A.

In the opinion of the examiner, that the wood splinters present in Exhibits E-301 and E-303 could have originated from Exhibit A.

Examination of paint chips removed from E-305 found same to be grossly identical in color, texture, and chemical composition to the paint of Exhibits E-203.

of the known hair from Exhibits E-314 through E-319 found
different physical characteristics to the hair of Exhibits E-4

opinion of the Examiner that the hair from Exhibits E-314 through
known hair of Exhibits E-4 and E-5 did not have a common source

of Exhibit E-12 revealed the presence of a short human head
grossly similar in all physical characteristics to the known head
E-305.

opinion of the examiner that the hair of Exhibit E-12 and that
could have originated from a common source.

E-19a and E-116 contained human body or pubic hair that was grossly
physical characteristics to the known hair of Exhibit E-313.

LABORATORY REPORT
P-FA-D-P-C-FP-82-70
(CONSOLIDATED)

UNIT CASE NUMBER
70-CID023-10198

It is the opinion of the examiner that the hair of Exhibits E-19a and E-116 have had a common source of origin with the known hair of Exhibit E-313.

Examination of Exhibits E-50, E-52NB, E-57NB, E-123, E-221, E-222, E-227, E-229 did not reveal the presence of any hair grossly similar to the known hair of Exhibits E-305 through E-313.

Comparative examinations of the hairs from Exhibits E-4 and E-5 revealed them to be dissimilar to the hairs from Exhibits E-305 through E-313.

Therefore it is the opinion of the examiners that the hairs of Exhibits E-4 and E-5 probably did not originate from the same point sources as the hairs of Exhibits E-305 through E-313.

However, it must be pointed out that the requested opinion regarding positively eliminating the subject as a possible source of the hair cannot be given without first examining numerous other point sources of body hair from the subject.

Comparison of wax removed from Exhibits D-123, G-131 and G-201 with the wax from Exhibits G (1-10) showed same to be different in chemical composition.

It is the opinion of the Examiner that the wax present in Exhibits D-123, G-131 and G-201 did not originate from the candles G (1-10).

The following findings were forwarded from this laboratory to the requesting agency as an addendum to the basic report.

Gloves of Exhibit D-245 are surgical gloves. These were received in original package and the gloves were intact.

Examinations were performed to see if the pieces of surgical gloves were the same type as the gloves of Exhibit D-245.

The following are approximate sizes of the pieces of surgeon's gloves:

- Exhibit I-3 - Size of a dime
- Exhibit I-21 - Three fourth's of one finger
- Exhibit I-213 - Size of a quarter
- Exhibit I-226 - Size of a dime

Handwritten notes:
L.F.P.'s

Exhibit L ("Esquire" with red stain on edge): The bloodstain appeared to be made by a person's finger due to it's shape. However, it can be positively stated that it was made by a person's finger since definite fingerprint formation was precluded by the separations of the individual ridges. Reference our Laboratory Report No. P-FA-D-P-C-FP-R15, dated 2 September 1975.

Exhibit E-1 contained particles of nut meats and hulls, small slivers of a pink and silver Christmas tree ornament and dust. No bloodstains were present.

UNIT CASE NUMBER
70-CID023-10198

b. Exhibit E-3 contained matted yellow paper fibers, particles of nut meats, small round dots of colored paper material and dust. No bloodstains were present.

Exhibit E-14 contained a small piece of dry vegetable matter, similar to grass or hay. No bloodstains were present.

Exhibit E-15 contained three (3) hairs grossly similar in all physical characteristics to the head hair of Kristen MacDonald. The roots were shrunken and dehydrated, indicating they were lost through normal attrition.

Exhibit E-22 contained one animal hair and one human head hair grossly similar to the head hair of Collette MacDonald. The root of this hair was shrunken and dehydrated, indicating that it was lost through normal attrition.

Exhibit E-117 contained two (2) animal hairs.

Exhibit E-124 contained one (1) animal hair and several fibers from the purple green and pink quilt in the south bedroom. No blood stains were present.

Exhibit E-129 contained several small pieces of dry vegetable matter similar to grass or hay. No bloodstains were present.

Exhibit E-206 contained one (1) animal hair and several blue, green and yellow single strand nylon fibers grossly similar to the fibers of the rug, Exhibit D-227.

Exhibit E-211 contained several pink nylon fibers and one (1) animal hair.

Exhibit E-51 MER contained multi-colored yarns similar to the type used in crocheting. No bloodstains were present.

Exhibit E-59NB contained several small pieces of dry vegetable matter, similar to grass or hay and one (1) animal hair.

Examination of Exhibits F-60 and F-115 showed same to be a small amount of hard yellow and white substance. No chemical tests were conducted on this substance.

Item, "red crusts" of Exhibit D-256 referred to suspected dried blood. It was not analyzed for anything other than blood type as indicated in paragraph of Preliminary Report.

Gloves of Exhibits D-33K and D-34K are not surgical gloves, therefore comparable with the suspected pieces of surgical gloves of Exhibits I-3, I-4 and I-226.

FBI - FA-D-F-C-FP-32-70
(CONSOLIDATED)

UNIT CASE NUMBER
70-CID023-10198

Fingerprint Division Findings :

Examination of Exhibits A thru C, I, K, M, N, and X did not reveal any suitable latent prints.

Examination of Exhibits L-1 thru L-10 revealed numerous latent prints on L-1 thru L-4, 109 thru 116, an advertisement page and back magazine cover.

Examination of Exhibit J revealed one latent fingerprint and one latent print suitable for identification.

Examination of Exhibits R-1 and R-2 revealed three latent fingerprints on R-1 and one latent print on Exhibit R-2 that are suitable for identification.

Examination of Exhibits S-1 and S-2 revealed one latent fingerprint on S-1 and one latent print on S-2 that are suitable for identification.

Examination of Exhibit T revealed one latent fingerprint suitable for identification.

Examination of Exhibits U-1 thru U-7, photographs of latent finger and palm prints, revealed:

Exhibit U-1 - One latent print.

Exhibit U-2 - Three latent fingerprints and three latent palm prints.

Exhibit U-3 - Thirteen latent fingerprints and eleven latent palm prints.

Exhibit U-4 - Three latent fingerprints and three latent palm prints.

Exhibit U-5 - Twelve latent fingerprints and seven latent palm prints.

Exhibit U-6 - Four latent fingerprints and four latent palm prints.

Exhibit U-7 - One latent fingerprint.

Examination of Exhibit W-5, headboard and footboard, revealed one partial print on the footboard.

Examination of the foot impression on the floor of the north bedroom

revealed that it was not made by the person whose record footprint is designated Exhibit V-2 (Collette MacDonald).

Examination of the foot impression on the floor of the north bedroom revealed that it was not made by the person whose record footprint is designated Exhibit V-3 (Ronald Harrison).
