Report of Examination

Examiner Name:	Robert Fram ^{Rof}	Date:	5/19/99
Unit:	Trace Evidence	Phone No.:	(202) 324-8915
Case ID #:	70A-CE-3668	Lab No.:	990111018 S ZJ 990202004 S ZJ 990318018 S ZJ 990412040 S ZJ

Results of Examinations:

A forcibly removed Caucasian head hair found on one of the Q96 resubmitted glass microscope slides, (labeled "19 1/2" on the slide), exhibits the same microscopic characteristics as hairs in the K2 specimen. Accordingly, this hair is consistent with having originated from KIMBERLY MACDONALD, the identified source of the K2 specimen. Two Caucasian head hair fragments found on this same slide are microscopically similar to hairs in the K2 specimen; however, these hairs are too limited for significant comparison purposes. A Caucasian body area hair found on this slide is not suitable for significant comparison purposes.

A Caucasian pubic hair found on one of the Q78 resubmitted glass microscope slides, (labeled "H's" on the slide), is dissimilar microscopically to hairs in the K22 specimen, and accordingly, is not consistent with having originated from JEFFREY MACDONALD, the identified source of the K22 specimen. A Caucasian body area hair found on the same slide, is not suitable for significant comparison purposes.

Hair comparisons are not a basis for absolute personal identification.

No other hair comparisons were conducted on the submitted items.
